

MESSAGE TO PARENTS BY SCHOOLS on their websites

India has resolved to eliminate Measles and control Congenital Rubella. For this every child in our school upto class 10th will be immunized by Health department with MR vaccine.

Parents should come forward and ensure their child participates in this National endeavour.

Safety measures will be ensured. Each child will be vaccinated with WHO prequalified MR vaccine using new Auto Disabled syringe that cannot be reused again. Trained health staff will vaccinate your child within school premises/ class under medical supervision.

More than 3.5 Crore children have already been vaccinated in Southern states in India which are heading for elimination of Measles

MR campaign is once in life time opportunity for benefit of your child as well as future generations

Giving one additional injection of MR vaccine irrespective of previous doses child has received in past will still be beneficial to your child

Children should eat Breakfast and do not come empty stomach to school on day of vaccination.

Very sick child will not be vaccinated

Teacher will escort children from class to vaccination room and then to observation room.
